Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

This application has been filed with informal drawings which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the plurality of rollers set forth in claims 3, 8, and 13 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: reference numerals 21 and 22 as set forth upon page 5. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because of the following informalities: reference numeral 20" set forth in line 16 of page 5 should be changed to 20'.

Appropriate correction is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Drake (US 2,668,963) in view of Reinhard (US 3,808,614). Drake shows a bedclothes support B that is formed from plural telescoping sections and which extends across the width of a bed. The support includes upwardly extending male members 16, 19 that engage female sections 17, 20 formed as portions of downwardly turned legs of the support, with the remainder of the support being formed by elbows 21, 22 and a joiner section 23. The male members 16, 19 are rigidly attached to support brackets formed by horizontal portions 16a, 19a and vertical sections 16b, 19b. The support brackets can engage the frame rails of the bedframe, as shown in Figure 7. Note also the hook shaped brackets D shown in Figures 4 and 5 which allow attachment to a metal bedframe rail. Drake thus shows all of the claimed subject matter except for the pivotal attachment of the bedclothes support with the support bracket. Reinhard teaches that it is known in the art to pivotally attach a bedclothes support 1 at its end portions to a pair of support brackets 3. A bolt 7 is used as a pivot for the legs of the bedclothes support, with the bracket

having an upright leg or plate that includes a groove 10 and stop 8. This allows the bedclothes support to be folded downwardly into a flat position on top of the bed when the bedclothes support is not in use. It would have been obvious to the skilled artisan to have provided the Drake bedclothes support with a pivoting attachment with the support brackets as taught by Reinhard, for the purpose of allowing the support to be folded flat when not in use.

Allowable Subject Matter

Claims 2, 3, 5, and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 7 to 15 are allowed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Fontenot et al and Swenson et al show bedclothes supports that are attached to a bedframe side rails which are of general interest. Fish and Schlein show bedframe transfer posts that are of general interest.
